REACH STATEMENT

Genalog is aware of regulation EC1907/2006, known as REACH (Registration, Evaluation, Authorisation and Restriction of Chemical substances)

Registration (or pre-registration) is required for companies that either produce or import into the EU any substance in volumes that exceed one tonne per substance per year. Genalog do not exceed this import amount, nor do we produce our own substances, and will therefore not be required to register.

We have contacted our suppliers to ensure they are aware of the regulations and REACH information for individual items will either be supplied with the goods, found at https://genalog.com/stockcheck/ or refer to the manufacturer's website/datasheets regarding products purchased from Genalog.

The contact at Genalog Limited for any issues relative to REACH will be the undersigned and is contactable by e-mail. Email The Genalog Quality Manager
